SUMMARY

Full Stack Software Engineer with 3+ years of experience building scalable web applications using React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, PostgreSQL, and modern state management solutions. Experienced in developing real-time applications using Socket.IO, designing RESTful APIs, optimizing database performance, and delivering production-ready software in agile environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, RTK Query, Zustand, Context API, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication, WebSockets

Databases: MongoDB, PostgreSQL, Prisma ORM, Database Indexing, Query Optimization

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Railway

Practices: Agile/Scrum, Code Review, Performance Optimisation, Secure Authentication, CI/CD

WORK EXPERIENCE

Software Developer

Apr 2025 – May 2026

Noem Ecommerce

Mumbai, India

- Collaborated with cross-functional teams to design, develop, and deliver scalable web application features within agile sprints, contributing to consistent on-time releases.
- Engineered and optimised backend REST APIs using Node.js and Express.js, reducing average page load times by **30%** through targeted MongoDB query improvements.
- Built and optimized scalable React.js and TypeScript frontend components, improving application responsiveness and contributing to a 20% increase in customer retention.
- Architected application-wide state management solutions with Redux Toolkit and Context API, eliminating redundant re-renders and improving data consistency by **40%**.

Frontend Web Developer

Sep 2024 – Apr 2025

Igniculuss

Remote

- Developed responsive CRM and HRM platforms using React.js, TypeScript, Tailwind CSS, and modern frontend architecture patterns serving 10,000+ enterprise users.
- Integrated authentication protocols that reduced login times by **35%** and strengthened user access security across multiple enterprise applications.
- Engineered dynamic state management pipelines, increasing data synchronisation efficiency by **40%** across client-facing applications.
- Led third-party API integration efforts, decreasing data transfer latency by **25%** and improving reliability for workflows supporting **\$50M+ in annual transactions**.

Full Stack Developer

Jan 2022 – Mar 2024

Trimvault

Mumbai, India

- Designed and developed RESTful APIs using Node.js and Express.js, enabling seamless communication between frontend clients and backend services with a **30% reduction** in response latency.
- Built and maintained reusable, component-driven UI modules using React.js and Tailwind CSS, accelerating feature delivery speed by **25%** across product iterations.
- Architected and managed MongoDB collections with optimised schemas and indexing strategies, improving database query performance by **35%** for high-traffic endpoints.
- Implemented JWT-based authentication and role-based access control (RBAC) on both frontend and backend layers, strengthening application security across all user flows.

PROJECTS

QuizBlitz — Real-Time Multiplayer Quiz Platform

2026

React.js, TypeScript, Node.js, Express.js, Socket.IO, PostgreSQL, Prisma ORM, Zustand

GitHub | Live Demo

- Architected and deployed a real-time multiplayer quiz platform enabling synchronized gameplay across multiple participants using **Socket.IO** and event-driven communication.
- Implemented room-based multiplayer functionality including room creation, participant management, live question broadcasting, synchronized countdown timers, and automatic quiz progression.
- Designed a server-authoritative scoring system with duplicate-answer prevention, real-time leaderboard generation, and persistent result storage using **PostgreSQL** and **Prisma ORM**.
- Managed client-side state with **Zustand**, ensuring low-latency updates for quiz state, timers, and leaderboard synchronization across connected users.
- Deployed the application using **Vercel** (frontend), **Render** (backend), and **Neon PostgreSQL**, implementing environment-based configuration and production-ready WebSocket communication.

EDUCATION

B.Sc. Information Technology

St. Rocks College of Commerce & Science, Mumbai

Graduated Apr 2022

CGPA: 7.75 / 10
